

MissionGreenFuels

Pool 2 - Assessment criteria

Below are four assessment criteria that form the basis for the assessment of the application for Pool 2 funding for the MissionGreenFuels Partnership. All four criteria are included in the assessment and contribute to the overall assessment. For a given application, some points may be more relevant than others.

Assessment Criteria

- 1) Quality of the idea**
- 2) Impact**
- 3) Quality of execution**
- 4) Relevance to the MissionGreenFuels Partnership's vision (as described in the Investment Agreement with IFD)**

This includes, but is not limited to:

- 1) Value chain coverage,
- 2) Societal value,
- 3) Accelerated Commercialization

Furthermore, the BoD evaluates the strategic fit to the vision and existing project portfolio. The BoD will furthermore evaluate whether the application is considered eligible for funding.
